## IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

### Monthly Reporting Requirements Not Being Met by Northstar MDWCA

Our water system recently violated a drinking water regulation. Although this is not an emergency, as our customers, you have a right to know what happened, what you should do, and **what we did (are doing)** to correct this situation.

We are required to submit turbidity data and chlorine levels to the State on a monthly basis on or before the tenth of each month of water production. This requirement has not been met for the month(s) of: February 2025.

#### What does this mean?

This is not an emergency. If it had been you would have been notified immediately.

Monitoring and reporting turbidity and chlorine levels in your water are important in ensuring safe water to all our customers. *\*Chlorine is added to the water to inactivate bacteria that may be present. Turbidity has no health effects. However, turbidity can interfere with disinfection and provide a medium for microbial growth. Turbidity may indicate the presence of disease causing organisms. These organisms include bacteria, viruses, and parasites which can cause symptoms such as nausea, cramps, diarrhea, and associated headaches. \* These symptoms are not caused only by organisms in drinking water. If you experience any of these symptoms and they persist, you may want to seek medical advice.*

Tests taken during this time period **did / did not** indicate the presence of bacteria in the drinking water system during this period.

#### What should I do?

You do not need to use an alternative (e.g., bottled) water supply. However, if you have specific health concerns, please contact your health care professional.

#### What is being done? [Describe corrective action.]

THE REPORT WAS SUBMITTED ONE DAY LATE, AT NO TIME WAS THE  
MOR PERFORMANCE DATA NOT TAKEN OR OUT OF COMPLIANCE. THE  
CORRECTIVE ACTION TO SUBMIT THE REPORT WHEN DUE.

We anticipate resolving the problem within THE REPORT FOR MARCH & APRIL WAS
